

Strong. Smart.
Reliable.

EcoFlex®

EcoFlex® technology, now available with Corbin Russwin CLX3300 Series cylindrical locks, represents a significant advancement in sustainability for electrified door openings. With 92% energy savings, the electrified CLX3300 Series cylindrical lock is ideal for electromechanical applications, whether it's used with a Wave to Open, Request to Exit, or Door Position Switches.

Experience a safer
and more open world

EcoFlex® for Cylindrical Locks

Technology Meets Sustainability

TECHNICAL SPECIFICATIONS:

12VDC or 24VDC applications

- 500mA lock body peak current draw
- 10mA lock body holding current draw*

**Approximately 5% of an equivalent solenoid*

AVAILABLE IN

- Electrified cylindrical locks

Features	Benefits
ANSI/BHMA Grade 1 certified cylindrical lock	• Strength and durability; assurance of high quality hardware
Reduced energy consumption and product sustainability measures	• Up to 92% energy savings, as certified by Green Circle • Lower operating costs • Assists with load reduction in optimizing energy performance credit in LEED • Reduces number of power supplies required for hard-wired locks • Improves battery life for offline locks
Field configurable to fail-safe or fail-secure	• A single lock body can be used for a variety of applications throughout a facility – Simplifies ordering – Reduces stocking requirements with one flexible lock – Offers greater flexibility to adapt to changing requirements
Ability to operate from 12 volts to 24 volts	• Greater flexibility in system design
Innovative actuator design	• Superior reliability – Higher performance and reduced maintenance – Ability to have longer cable runs without negatively impacting lock function – Reduces risk of voltage drops and eliminates inductive kickback – Lower total cost of ownership
Available with a wide range of finishes and decorative levers	• Blends into any environment seamlessly
